Our strategy towards 2030

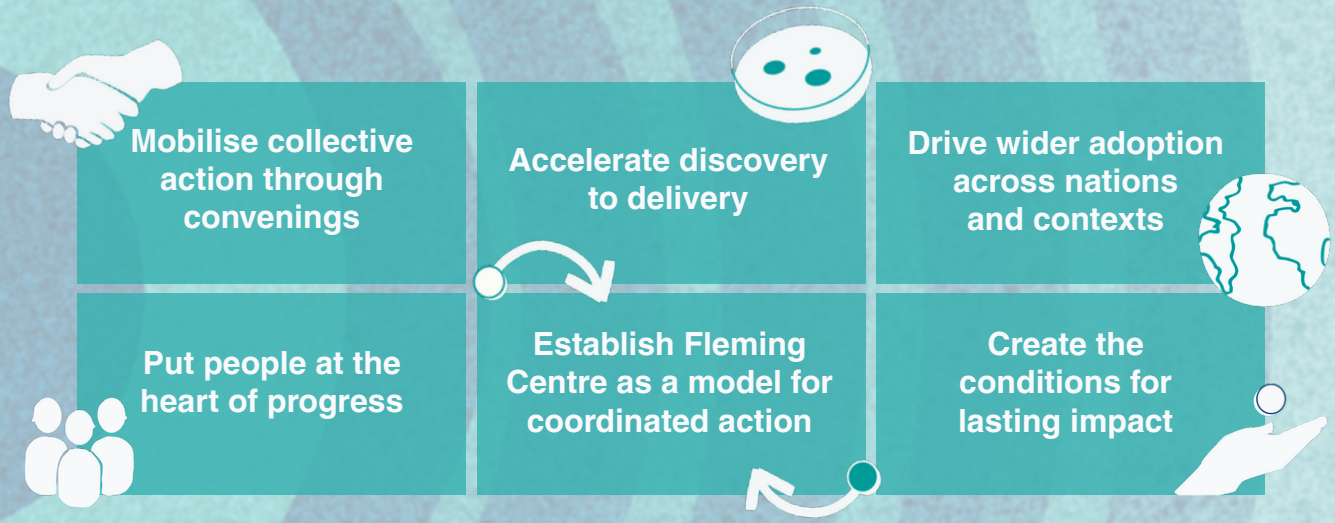
FLEMING INITIATIVE

A partnership between IMPERIAL and Imperial College Healthcare NHS Trust

OUR VISION A world in which antimicrobial resistance no longer poses a significant threat to people's health

OUR MISSION To create the collective action and help move ideas into practice and wide adoption

WHERE WE WILL ACT



HOW WE WORK

- Work across boundaries
- Focus on where we impact most
- Lead where we add value; champion where others are better placed
- Collaborate with the public
- Collaborate with the public

WHAT SUCCESS WILL LOOK LIKE

We have become
A trusted integrator, a proven model, a credible partner, and a resillient presence

And have contributed to
More connected AMR response; translation at pace and scale; people becoming more central to AMR actions; and the ecosystem's capability for sustained action

This strategy is the result of a comprehensive consultation period, and together reflect the purpose and priorities of the Fleming Initiative staff, our Public and International Advisory Groups, our partners and collaborators, as well as stakeholders in the wider AMR landscape.
